QUALIFICATIONS

Knowledge of:
• Operations, services, and activities of a comprehensive building inspection program.
• Principles and practices of structural and municipal engineering.
• Principles of mathematics as applied to building and engineering work.
• Recent developments, current literature, and sources of information regarding building industry and code enforcement.
• Construction principles and practices.
• Modern office procedures, methods, and equipment including computers.
• Principles and practices of program development and administration.
• Modern and complex techniques and practices of building construction.
• Soil and geology as applied to grading construction.
• Principles and practices of municipal budget preparation and administration.
• Principles of supervision, training, and performance evaluation.
• Pertinent Federal, State, and local laws, codes, and regulations including construction law, uniform building codes, and electrical codes.

Skill in:
• Planning, organizing, directing, and coordinating the work of lower level staff.
• Selecting, supervising, training, and evaluating staff.
• Delegating authority and responsibility.
• Overseeing and directing the operations, services, and activities of Building and Code Enforcement Divisions.
• Reading, interpreting, and analyzing electrical, structural, plumbing and mechanical plans.
• Identifying and responding to community and City Council issues, concerns and needs.
• Developing and administering departmental goals, objectives, and procedures.
• Preparing and administering large and complex budgets.
• Analyzing problems, identifying alternative solutions, projecting consequences of proposed actions and implement recommendations in support of goals.
• Researching, analyzing, and evaluating new service delivery methods and techniques.
• Interpreting and applying Federal, State, and local policies, laws, and regulations.
• Communicating clearly and concisely, both orally and in writing.
• Resolving engineering, regulatory and system design questions.
• Establishing and maintaining cooperative working relationships with those contacted in the course of work.

EXPERIENCE AND TRAINING GUIDELINES
Any combination of experience and training that would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the knowledge and abilities would be:

Experience:
Five years of experience in building inspection or construction including two years of administrative and supervisory responsibility.

Training:
Equivalent to a Bachelor’s Degree from an accredited college or university with major course work in architecture, civil engineering, public administration, or a related field.

Licenses or Certifications:
- Possession of International Code Council (ICC) Building Official Certificate.
- Possession of, or ability to obtain, an appropriate, valid driver's license.

WORKING CONDITIONS

Environmental Conditions:
Office, field, and construction site environments; travel from site to site; exposure to noise, dust, grease, smoke, fumes, and gases; extensive contact with the public, developers, and contractors.

Physical Conditions:
Essential functions may require maintaining a physical condition necessary for sitting, standing, and walking for prolonged periods of time; visual acuity for reading engineering drawings and plans; operating motorized vehicles.
